

Aviation & Flight Simulation Conference for Pilots and Enthusiasts
June 13-14, 2015 • New England Air Museum

FlightSimCon 2015, an annual aviation and flight simulation conference, will be held at the New England Air Museum at Bradley International Airport (15 minutes north of Hartford, Connecticut, USA) on June 13-14, 2015.

FlightSimCon is designed to show pilots and aviation enthusiasts the power of at-home, desktop flight simulation. For pilots, at-home simulation offers the ability to participate in a realistic online training environment with other pilots and virtual air traffic controllers. It allows pilots to “think flying” between flights, improve radio work, and practice IFR procedures, all in a fun and safe environment.

The conference is targeted towards those with a passion for aviation. While many attendees are also pilots, there is no requirement to have an aviation background. The conference has activities scheduled for those of all experiences, from career-focused discussions by flight instructors and airline pilots to “how-to” seminars on setting up a first at-home simulator.

In addition to participating in live demonstrations, attending exhibits and seminars, and trying out simulators, conference attendees have access to the New England Air Museum, the largest aviation museum in New England. Located approximately 20 minutes north of Hartford, CT in Windsor Locks, CT, just off the grounds of Bradley International Airport, the Museum contains multiple hangars of interactive exhibits and displays, including more than 70 aircraft on display.

The 2015 event focuses on:

- The benefits that an at-home, desktop flight simulator can have for pilot currency, proficiency, and training
- How aviation enthusiasts can use desktop simulation to reach a world that might otherwise be closed to them
- ‘How-to’ seminars on setting up your own at-home, desktop flight simulator—for around \$2000

FlightSimCon is a Glander Associates Event Management Production

www.flightsimcon.com | info@flightsimcon.com | 1-860-727-0050 | 1028 Boulevard #323, West Hartford, CT 06119

- The transition from training to employment: helping student pilots, and high school and college students, realize their dream of becoming airline pilots

The event will feature exhibits from many of the largest FSX and flight simulation developers, as well as suppliers of real-world aviation hardware. There will be ample opportunity to explore different FSX configurations or to step into a virtual cockpit and try desktop flight simulation firsthand.

This event is open to the public and is for all ages. For just \$60, attendees have full access to the New England Air Museum and all FlightSimCon events for the entire weekend! Discounted registration fees are available for students and student pilots.

Registration and more information is available online at www.flightsimcon.com.
