

NJSPLS Proudly supports the New Jersey State Archives, Early Land Records Project.

The incredible project was originally announced in New Jersey State Archives | The Genealogical Society of New Jersey, *GSNJ Newsletter*, Volume 25, Numbers 3–4, Fall–Winter 2016 “...*The inclusion of the records of the East and West Jersey Proprietors and certain county land records in NJSA’s database will create a single statewide resource spanning the entire colonial period.*”

As the project continues, original surveys and treasures were uncovered and added to the database.

From the New Jersey State Archives Facebook post: “More online images have been posted to the Early Land Records database! As part of the New Jersey Early Land Records Project, images from East New Jersey’s Survey Books L and L2, dating from 1682-85, were added to the State Archives’ online database.

This brings the total number of land-record pdfs online to roughly 850. Images from Basse's surveys and conveyances (1687-1755) and Nevill's Book A of Deeds (1684-1692) were posted in October 2017. At least 10,000 images will be added to the database overall, as part of the local and federally grant-funded project.
