What Makes Healing in America Different?

Our core beliefs drive our desire to raise awareness and to integrate professional energy healing services into the mainstream medical community. Our certified training program teaches students an energy healing technique originally developed in the 1950's by the world renowned healer, Harry Edwards. This simple yet powerful technique taught by our founders at Healing in America is widely accepted in medical communities throughout the world. Today energy healers are employed in hospitals in England and many oncology departments in the U.S. take advantage of our services.

What Happens After My Training?

We believe it is important to have ongoing support and mentorship after completing the Certified Energy Healing Training Program. We offer regular conference calls and group practice meetings, giving you the opportunity to stay connected with the organization and to continue to develop your skills and experience. You will also be invited to work with the public during our regular "Healing Circles" offered at the Holistic Healing Center in Ojai.
