

Meet Megan Masterson

The AEG *Insider* is proud to announce, starting this week, that we will feature short bios for one of the six AEG *Insider* editors or a leader in the AEG community. Here is an introduction to one of the AEG Insider editors — **Megan Masterson**.

Megan Masterson attended Portland State University and graduated with her Bachelor's of Science in Geology and a minor in Computer Applications in June 2013. Future plans include rejoining the PSU community in the fall to pursue a Master's Degree in Geology, focusing on hydrogeology.

In her spare time, Megan enjoys being outdoors – hiking, camping, running and gardening – as well as enjoying the beers and wines of the Willamette Valley.
