

Meet Eric Walston, P.G.

Eric Walston is a Licensed Professional Geologist in the states of Texas and Missouri, with over eight years of experience with materials laboratory and geotechnical operations and two years with environmental site investigations. He has developed several geotechnical and construction testing laboratories, a petrographic laboratory and quality control programs.

While working in the environmental discipline, Mr. Walston gained field experience in the South Texas Plains, Prairies and Lakes Texas region, as well as northern Virginia. Mr. Walston is currently the North Texas/Oklahoma District Quality Manager for Martin Marietta Materials.

While studying for his Bachelor of Science in Geology degree at Northwest Missouri State University, he was an active member of geology organizations sponsored by the geology department. He was president for Sigma Gamma Epsilon, a national honorary society for earth sciences, in 1997. Mr. Walston also volunteered with USGS for two summers at Yellowstone National Park gaining experience mapping and field investigations with volcanic tuffs.
