

## Meet Jessica Humble

Jessica Humble is the co-chair for the 2014 Annual Meeting to be held in Scottsdale, Ariz. She has been a member of AEG since 2000 when she became involved with the student section at Missouri S&T. She continued her involvement in AEG during her graduate studies at Colorado School of Mines. Dr. Jerry Higgins and Dr. Paul Santi encourage students to be involved in AEG and to also attend the Rocky Mountain Section meetings.

After graduation, Jessica began working at Gannett Fleming as a geotechnical engineer in the Phoenix office. Arizona did not have an AEG section at the time, so Jessica, with the help of many of her fellow AEG Arizonans, started the Phoenix Chapter in 2004. She served as the president of the Phoenix Chapter for two years. The Chapter became a section years later and is still thriving today. Jessica is a Marliave Scholar, Piteau Award recipient, and served as an AEG Foundation Director from 2008 to 2011.

Jessica currently works at Gannett Fleming as a geotechnical engineer, primarily working on transportation projects. Her work includes geotechnical investigation and characterization, rock slope mapping and analyses and foundation design.

Jessica has three wonderful daughters, ages 6, 3 and 7 months. She enjoys hiking and running. Jessica loves spending time with her family above all else.
