Updates on environmental and engineering geology impacting AEG Members

**Announcing a new and powerful collaborative partnership for online education  
in environmental and engineering geology topics!**

### Reach Out Globally Using the Internet

Share your knowledge and expertise  
Help other professionals in your field  
Create opportunities beyond the webinar  
Support AEG in a new and exciting way

#### Our Mission

- Provide meaningful online education to AEG Members with continuing education options.
- Provide AEG members a platform to present webinars and reach other professionals on a global scale.
- Provide discounted webinars to AEG members.
- Offer select webinars with special features such as pre-webinar AEG forums and handouts.
- Showcase select AEG webinars to the public free of charge.
- Use one-time webinar discount to encourage new AEG membership.
- Enhance AEG income with a share of webinar revenue.

#### We welcome webinar topics that satisfy the following:

- Teach technical skills that apply in a common way for a specific application.
- Update professionals with new techniques and trends in technical tools.
- Promote best practices.
- Present new, engaging, basic or advanced strategies for subsurface work.
- Demonstrate methods that help environmental and engineering geologists do their work.

#### Get Started Now:

- Start with a thoughtful idea that provides a solution to a meaningful technical challenge
- Read the Standards and Guidelines on the AEG-MidwestGeo Webinar Webpage
- Log into the AEG-MidwestGeo Webinar Webpage and click '**PROPOSE TO TEACH**'
- Input your outline, technical challenge and solution statement, an abstract, highlights, and title.
- Create and teach a fun webinar experience with our content managers
- Help other professionals, our industry, our planet, and our future.
