Tradeshow**

SERLACIII/ALOA Locksmith Convention

May 9 - 12, 2012

Course Descriptions:

Wednesday, May 9, 2012:

E007 Installing and Servicing Electronic Access Control Systems (P-40)

Instructor: Chuck Dixon, CML

8 hours

This class is designed to give an overview of electronic access control. The class will emphasize tools, equipment, and circuits. We will assemble basic circuits and look at troubleshooting. By the end of this class students should have a working knowledge of beginning electronic access control installation and troubleshooting. Students are encouraged to bring their own digital volt ohm meter, multi-tip screw driver, pocket screwdriver, needle nose pliers, and wire strippers. **Prerequisite: Basic electricity class or an understanding of Ohm's law, Watt's law, and basic electrical circuits. Lab Fee \$20.00 for "Learning About Electronic Locks". PRP Section L-40 will be offered after class. ALOA Members - \$25.00 & Non-Members - \$30.00.**

B003 Alternative Entry Techniques

Instructor: David Thielen, CML

8 hours

This class deals with the last resort techniques and theory of cylinder bypass methods. Demonstrations of bypass techniques covering some of the most popular residential and commercial locksets will be performed. Discussion and presentations will also include narrow stile locks, tubular key locks, lever locks, Safe Deposit locks, interchangeable core cylinders, padlocks, templating for drilling high security rim and mortise cylinders and office equipment. Students will learn to perform bypass techniques that can be used to open a wide variety of locks and locking devices. *The information presented will be useful in preparing for PRP section L-00.*

B012 Life Safety Codes w/ADA (P-07)

Instructor: Edward A. Hite, CML, CFDI

8 hours

This is a must class for the locksmith/security professional of the 21st Century. The areas covered will include the new International Building Code, IBC 2006 Chapters 3, 4, 10 & 11. The National Fire Protection Association, NFPA 80-2007, NFPA 101-2006, Underwriters Laboratories product listings, and ADA Act of 1990. Each student will leave with a clear understanding of how the building and fire codes work. *Each student will receive a manual for a future reference guide. Lab Fee \$45.00 for the class manual.* The information presented will be useful in preparing for PRP section L-07. *PRP Section L07 will be offered after class. ALOA Members - \$25.00 & Non-Members - \$30.00.*

Thursday, May 10, 2012:

E011 Closed Circuit TV Design & Installation Course (day 1 of 2)

Instructor: Chuck Dixon, CML

16 hours

This class covers a range of CCTV equipment and installation techniques including types of cameras, types of lenses, calculating light requirements, uses for each, mounts and housings, wire and cable, connectors, monitors, Digital Video Recorders(DVR) and system design. The second day of the class includes a hands-on installation of a multi-camera and monitoring CCTV system including DVR, remote monitoring and integrating into a networked access control system. Upon completion of the class students will have a basic understanding of how a CCTV system functions, what products to select, how to strip wires, attach connectors, install cameras on mounts, hook cameras to a monitor and a DVR. **Lab Fee: \$90.00 per student for a 326 page CCTV System Design & Installation Manual.**

B011 Hollow Metal Door & Frame Servicing

Instructor: David Thielen, CML

8 hours

This class will introduce the student to Hollow Metal Doors and Frames, including nomenclature, design, installation, repair, and servicing techniques of various types of doors and frames. There will be a demonstration of tools as well as lecture, discussion and videos of troubleshooting and repair techniques. The hands on portion will give the student some valuable experience in installing locks, repairing hinges, retrofitting hardware, preventing door collapse, cutting doors, and other profitable skills. **Materials to bring to class: Students should bring an assortment of screwdrivers and Allen wrenches.** The information presented will be useful in preparing for PRP section L-28.

Friday, May 11, 2012:

SL021 ALOA Certified Fire Door Inspector (Day 1 of 2)

Instructor: Edward A. Hite, CML, CFDI

16 hours

This is must class for the professional locksmith today. At the completion of the 2 day class and the successful completion of the additional requirements, you will be eligible to become an ALOA Certified Fire Door Inspector (CFDI). IFDIA is the only association with an IAS accredited curriculum. IFDIA and ALOA bring quality educational standards to the business of fire door inspections. We provide a completely green online reporting and communication environment for the annual fire door assembly requirement as outlined in NFPA 80. This 2-day class includes the IFDIA Online Course with exam in a classroom environment as well as the ALOA Fire Door Field Inspection Course and a review of the International Fire Code 2009 edition with an exam. *For those who have not passed the ALOA PRP L-07 Life Safety Codes exam it will be given at the completion of the class.* **Perquisite: You must log in to the IFDIA site <http://www.ifdia.org/elearning/> and pass the IFDIA Pre-Qualification Quiz.** **Lab Fee ALOA Members - \$1,495.00, Non members - \$1,695.00**

E011 Closed Circuit TV Design & Installation Course (day 2 of 2)

(See day 1 for description)

B008 Servicing Aluminum Storefront Doors

Instructor: David Thielen, CML

8 hours

Learn about aluminum storefront doors and frames, and their unique hardware. Door/frame construction, locks, closers, pivots, and other hardware will be presented with an emphasis on installation, servicing, adjustments, and retrofitting techniques.

Improving security on these doors will also be discussed. Some hands-on will be involved. *Although handouts are included in the class, students will have the option of purchasing the Aluminum Stile Door Service & Repair Manual by Jake Jakubowski for a special reduced price of \$100.00.*

Materials to bring to class: Allen wrenches and a set of screwdrivers. Prerequisite: Basic Locksmithing

The information presented will be useful in preparing for PRP section L-28.

SL021 ALOA Certified Fire Door Inspector (Day 1 of 2)

(See day 1 for description)

SERLACIII/ALOA Locksmith Convention

May 9 - 12, 2012

Waiver of Liability

I understand that during the course of taking instruction in many of the classes and seminars I may register for, I may directly or indirectly be in contact with or use machinery and/or hand tools that if misused or if proper precautions are not taken, could result in injury or death. I understand that ALOA/SERLAC will take all measures possible to make certain machinery and/or hand tools are in good working order. I further understand that first aid items as well as local medical care facility contact information is readily available should an emergency occur. I agree to hold the Associated Locksmiths of America or SERLAC, its shareholders, designated agents, instructors and employees harmless in event of an injury or death due to personal negligence during the training session(s).
