Goodman School of Mines and Mineral Exploration Research Centre (MERC) present:

## Exploration Targeting

November 5-7, 2014

8:30 am - 5:00 pm

Laurentian University Campus

Sudbury, ON

**Speaker:** Michael Doggett, Mineral Economics Consultant and Adjunct Professor at Queen's University

This course will address the issues that face exploration groups in a changing global environment for the mineral industry. These issues include fluctuating commodity prices, the escalation in costs associated with constructing and operating new mining projects, the capital crisis facing many junior explorers, and the refocus of senior companies on quality rather than size of assets. We will examine how these topics impact on the minimum tonnage grade conditions required to justify the cost and time of discovering new economic deposits. Course materials will draw on a broad range of international case studies with emphasis placed on the gold and base metal sectors.

### REGISTRATION FEES:

**Early-Bird Rate:** \$1,600/person (prior to September 12th, 2014)

**Regular Rate:** \$1,800/person

**Student Rate:** \$165.00/person (limit of 20 students)

**Deadline for Registration:** October 24th, 2014

Cash, cheques or VISA accepted.
