A Practical Approach to On-Site Adequacy Assessment of Fine Needle Aspiration Biopsies
Sara E. Monaco, M.D.
Associate Professor, Director of FNA Biopsy Service, Children’s Hospital of Pittsburgh of UPMC, Director, UPMC Cytopathology Fellowship Program, University of Pittsburgh Medical Center – Shadyside Hospital, Pittsburgh, Pennsylvania

1. Understand the diagnostic value of on-site adequacy evaluation of FNA biopsies
2. Be familiar with and be able to apply criteria for adequacy of common FNA sites.
3. Recognize the importance of proper sample triage for ancillary studies
4. To appreciate important diagnostic pitfalls, in order to increase concordance between preliminary and final diagnoses of FNA biopsies
