

International Conference on
Wood Adhesives

OCTOBER 25-27, 2017
ATLANTA, GEORGIA, USA

Future of Engineered Wood Markets – Learn More in Atlanta

In Atlanta this October, the [International Conference on Wood Adhesives](#)—the premier technical conference on advances in adhesion of wood and biomass—convenes for three days of sessions, workshops, exhibits, and networking.

One of the highlights of the [plenary program](#) is Dave Fell, Research Leader for Business Intelligence, FPInnovations, who will address the ***Perspectives on the Future of Engineered Wood Markets***. Mr. Fell will provide an overview of the current status and emerging trends in the engineered wood markets that drive demand for adhesives. He will discuss the current state of the markets, emerging trends that may affect engineered wood, and the ever-increasing role of sustainability and energy efficiency in the built environment.
