

BERRYVILLE, Ar. - The International Defensive Pistol Association ([IDPA](#)) announced that [Atlanta Arms](#), who is the ammunition of choice for many of the military, law enforcement, and professional shooters, has signed on with IDPA as the newest Platinum Corporate Sponsor.

"By becoming a corporate sponsor, Atlanta Arms has partnered with IDPA to help expand an important segment of the broader shooting community. Our goal at IDPA is to reach out to new and existing gun owners to encourage them to not only own guns, but to get out and shoot them in a safe, fun and challenging environment," said Robert Ray, membership and marketing director for the International Defensive Pistol Assn.

"Atlanta Arms is excited to sponsor IDPA where shooters get to compete in simulated, real-life, self-defense scenarios. We are proud to support IDPA and competition shooting sports." said Chris Davis, Marketing Director

Atlanta Arms joins, the National Shooting Sports Foundation, Smith & Wesson and Wilson Combat as a corporate sponsor of IDPA providing major financial support for the organization.

Noting that more than 6 in 10 IDPA survey respondents indicated that they reload ammunition, primarily for handgun and rifle, Ray added, "Reloading is a major activity among IDPA members who invest a great deal annually on their equipment and shooting supplies. Now those reloading can turn to Atlanta Arms and support a company that supports their sport."

For more information on IDPA, or to join the more than 25,000 members competing each week all across America, visit www.IDPA.com.

You can further connect with the IDPA community through IDPA's social media, such as [@OfficialIDPA](#) on Twitter and ShootIDPA on [Facebook](#), [Instagram](#).

About Atlanta Arms:

Atlanta Arms is the premier source for both remanufactured and match ammunition. All remanufactured ammunition undergoes extensive cleaning, full length sizing, and chamber checking, to meet factory specifications. Our match line of ammunition continues to be the standard for the Army Marksmanship Unit and other professional shooting teams alike. Both the remanufactured and match ammunition are loaded using the highest quality components made specifically to meet our specifications.
