

Introducing the **NEW** Mantis Uplight from the brand you trust

Sarasota Florida – When managing flying insects in public areas, compromise is not an option, yet finding a professional insect light trap (ILT) that combines an attractive innovative design that's discreet and effective can be as elusive as the search for the Holy Grail; however PestWest has done this with striking results to produce the **new Mantis Uplight**.

This attractive and stylish system is wall mounted and is perfect for use in most public areas, providing optimal results where flying insect management needs to be discreet, fast and effective, such as restaurants, office buildings and any front-of-house application.

The Mantis Uplight is disguised as a wall sconce and the front cover can be painted, wall papered, or decorated to match your existing décor making it a subtle, flexible and an attractive system not only for flying insects, but for people too!

PestWest has field tested and proven the new design to provide you with the very best results available. The system is constructed of a zintec steel, not plastic that can easily break and a PestWest standard black, full-size glue board, and a 15-watt Quantum™ lamp (low mercury) that is hidden from view providing unsurpassed efficacy you've trusted from other PestWest products.

Quick reference guide:

- Quantum™ lamps and glue boards (Universal, standard, plastic and gray grid matrix) are interchangeable with many other PestWest systems
- Dimensions: H: 8 ¾" W: 18 ½" D: 8 ¼"
- Constructed of durable zintec steel, not plastic.
- Weight: 8lb
- Finish: Magnolia
- **AVAILABLE NOW**
