

Master ICD-10 with AAFP's Coding Toolkit

By AAFP

Designed to help fuse precision into your process, AAFP's "Coding Toolkit"* offers practices a guided, family medicine-specific map to a smooth ICD-10 conversion by pairing the voice-guided [ICD-10 Educational Series](#) with the Academy's easy-to-use [ICD-10 Flash Cards](#).

AAFP's ICD-10 Educational Series uses 11 voice-guided PowerPoint modules to guide you through the top 50 diagnosis codes in primary care, as well as to help you gain an in-depth understanding of how ICD-9 differs from ICD-10. In addition, the AAFP ICD-9 to ICD-10 Referential Flash Cards put the top 823 Primary Care diagnoses at your fingertips to help you maintain, or even improve, coding accuracy throughout the impending ICD-10 transition.

Make sure your practice is properly compensated for the services it provides. Get the full toolkit and start mastering ICD-10 today at aafp.org/codingtools.

*Series and Flash Cards sold separately."
