On July 1, 2018, the state of Maine, along with other New England states, began transitioning to ULSHO. With many of our heating oil dealers educating their customers to state and national legislation written to reduce carbon intensity and green-house gases, their customers already have an understanding of the importance of our transition to ultra-low sulfur/biodiesel blends.

Join Barry Aruda from Advanced Fuel Solutions, Inc., for an overview of the benefits and challenges facing our membership as you enhance or begin the development of internal and external communication of a better, safer and cleaner fuel in the state of Maine.

Advanced Fuel Solutions, Inc. (AFS) is the leading distributor of fuel additives having grown our business over more than two decades by offering fuel quality solutions, for all middle distillates, that reduce costs for end-users, increase market share for fuel suppliers, and protect our customers' assets at every level of the supply chain.

After registering, you will receive a confirmation email containing information about joining the webinar.
