Workers Compensation Self Insured Trust to return \$150,000 to its members

Once again the Trust will be releasing just before Christmas a total of \$150,000 to its members.

Two years ago \$750,000 was released. Historically since 1994 the trust has returned approximately \$4.5 million dollars in surplus to its participants! This remarkable record is a testimony to the commitment made by participating companies to work hard at increasing workplace safety and reducing the incidence and severity of workplace injuries by implementing safety programs and other safety measures which have directly resulted in an improved loss record. Everyone on the planet today wants to sell you workers comp insurance but if you want to get involved in a workers' comp program which has strong marketer directed loss control; rigorous claims management and very competitive rates and does not include brokerage fees, premium taxes and insurance company overhead such as in the commercial market then you need to get a quote today from Robin at MEMA.
