## **ENR Special Sections Presents: NDA's Demolition Section**

**Issue Date: October 20**

**Close Date: September 29 / Artwork due: Oct 6**

Showcasing the best practices and projects of the modern demolition contractor ENR's Demolition section is one of the largest public relations and marketing efforts that the National Demolition Association (NDA) undertakes every year. **THIS YEAR IT IS PLACED IN ENR'S TOP SPECIALTY CONTRACTORS RANKINGS ISSUE.**

This section presents NDA members with an opportunity to showcase their project skills and capabilities in one of the world's premier construction publications. *Section advertisers can work with NDA Executive Director Mike Taylor to submit a project profile, product or equipment profile or an executive viewpoint.*

Modern demolition contractors bring a host of skills to every project. An intrinsic understanding of the nature of structures is not enough. They must also have a mastery of the demolition process, know how to plan a project to get it done quickly, cost effectively, and protect the environment. The complexity of the projects in this section shows just how skilled the modern demolition contractor needs to be to compete in today's marketplace.

**Past ENR Demolition section advertisers** read like a who's who of the demolition industry, from contractors such as: Adamo, MCM Management, Brandenburg, Costello Dismantling, Dykon, Envirocon, Fiore & Sons, Frontier Demolition, Joseph B. Fay, NCM, North American Dismantling, SB Cox, Sessler Wrecking and Spirtas, to equipment suppliers like Allied-Gator, Caterpillar and Genesis.

### **DISCOUNTED RATES and Digital Benefits:**
