The JORNADAS TECNICAS de CHEMOTECNICA ARGENTINA have come to an end for this year and have had great success. During two days (10 and 11 May) about 1,000 people overflowed the facilities of the Catholic University of Argentina in Puerto Madero, Buenos Aires, Argentina.

For 13 years the technical conferences have become a must for companies urban pest control (PMPs) of Argentina and Latin America place. The quality of national and international speakers is one of its highlights.

They were held several events in parallel in another room to complement the spine that generate these JORNADAS

One of these activities was the International Conference on Dengue, Chikungunya and Zika, Challenges in the control of Aedes aegypti, organized by the Fundacion MUNDO SANO, attended by over 150 people, with Argentine government officials also from Paraguay, and areas affected by epidemics caused by Aedes aegypti. Also they attended by researchers and private sector members pest control.

Specialization also at its best professionalism in the sector, was developed in a Workshop on IPM in the Food Industry (about 87 people).

Finally it was developed a Symposium on Associations in Latin America, where the General Director of ANECPLA, Milagros F Lezeta, expanded on the path followed by ANECPLA from its formation to its current situation, to lead the sector of Pest Control in Spain and Europe. Alain van Lidth de Jeude, in the name of CEPA, gave a presentation, how last year the pest management industry launched the CEN standard (EN 16636) for use across Europe and how this is now being rolled out under the CEPA Certified verification scheme.

The Symposium was attended by about 36 colleagues PMPs from Uruguay, Chile, Peru, Mexico, Bolivia, Colombia and Argentina. Milagros also spoke to more than 500 PMPs to convince them the advantages of participating in the Associations, certainly a presentation that will generate the growth of these Associations in the coming years.

CHEMOTECNICA S.A., a company that leads the industry of PEST CONTROL in Argentina and markets its products in more than 13 countries of Latin America, focuses these activities on the professionalization of the sector with the ultimate goal of protecting public health and maintaining quality of life.
