SIMposium 2015: Join us IN THE FAST LANE in Charlotte!

Did you know Hudson Motor Company was the first manufacturer to support a NASCAR race team? The Hudson Hornet was an impressive car for its time, but today's stock cars (called Generation 6 cars by NASCAR) are capable of speeds in excess of 200 mph!

Just as technology has improved the overall speed, performance, and reliability of stock cars, so too has it improved our business environment – to dizzying effect!

Join the business-equivalent of the Generation 6 team in Charlotte for SIMposium 2015, where today’s FAST TRACK leaders will meet to gain and retain their EDGE.

In case you haven’t guessed, our Monday Night Event will be held at the NASCAR Hall of Fame this year!

SIMposium 2015 Registration is open! Take advantage of Early Bird pricing today!
