

Blackshape Prime has landed in North America

Recently approved by Transport Canada for the Advanced Ultralight Aircraft (AULA) class, the Blackshape BS100 Prime opens up a new segment in the high performance sport aircraft market of the North America. A demonstration model is being flight tested at the Lachute Airport (CSE4), 40 minutes west of Montreal, Quebec.

COPA V-P of Operations, Patrick Gilligan, is scheduled to do a flight review in the coming weeks.

A more evolved version with 115HP and a 750 kg maximum takeoff weight (MTOW) is in preparation for certification in Canada and the United States.

The aircraft will be distributed in North America by the Aircité Aviation – Aviasport partnership.
