

## **AIG, Magnes and COPA celebrate a successful first year of partnership on COPA's VIP Aviation Insurance Program and announce several new initiatives for 2015**

Earlier this year, Executives from American International Group, Inc (AIG) hosted The Magnes Group Inc. and the Canadian Owners and Pilots Association at AIG's Canadian Head Office in Toronto to celebrate a successful first year of partnership.

The past 12 months saw over 20% new business added to the program and continued growth with overall strong performance.

Greg Sterling, AIG Light Aviation Global Product Line Manager said: "We could not be more pleased in the relationship with COPA and the Magnes Group. The first year of the program has been an unqualified success and we look forward to continuing to serve the aviation insurance needs of COPA members in 2015."

"2015 will be an exciting year with several new benefits for COPA members" said Belinda Bryce, Partner at Magnes.

"Magnes and AIG's initiative to invite COPA to participate in examining and brainstorming improvement ideas for the VIP program is innovative, proving dedication and commitment to our program," said Patrick Gilligan, Vice-President Operations, COPA National.

In addition to several new coverage and pricing enhancements, COPA endorsed a new product earlier this year that is tailor-made for Flight Instructors offering them liability protection in event they are held negligent for bodily injury or property damage as a result of providing training.

In addition, on April 24<sup>th</sup> at 1:00 pm EST, AIG will be hosting a live webinar introducing COPA members to the new reality of sharing the skies with Unmanned Aerial Vehicles. Full webinar details can be seen below.

Also announced was the first "All Canadian Pilots Reception" to be held on Tuesday, July 21<sup>st</sup> at the 2015 Air Venture in Oshkosh. This event will be co-hosted by COPA, AIG and Magnes and open to all Canadian pilots, their friends and family. Early Registrants can double their chances to win an iPad mini loaded with Foreflight.
