

Chelation Therapy Trial Proves Chelation Works!!!

By Roy Heilbron MD

New Sub-study shows 50% reduction in mortality.

The Trial to Assess Chelation Therapy (TACT) presented amazing, ground breaking results in the diabetic sub study at the recent American Heart Association Meeting and published in Circulation. "The Effect of an EDTA-based Chelation Regimen on Patients With Diabetes Mellitus and Prior Myocardial Infarction in the Trial to Assess Chelation Therapy (TACT)."

TACT was a \$31 million, 10 year, double blind, randomized, placebo controlled, NIH sponsored, government study evaluating the efficacy and safety of chelation therapy in post MI patients over 50 years old. Patients received 40 infusions of EDTA chelation or placebo on top of standard medical therapy of aspirin, beta-blockers, ACEI, and statins. 633 (37%) of TACT patients had diabetes.

An astounding 50% reduction in diabetic deaths was noted. Other results all showed amazing results for chelation therapy. And amazingly safe. $P < 0.001$ (essentially zero, amazing, I've never seen such a low P value, ultra, highly significant.)

Primary endpoint (death, reinfarction, stroke, coronary revascularization, or hospitalization for angina) reduced 41%.

Also helped:

Death reduced 43%

MI reduced 52%

Coronary Revascularization: 32%

Hospitalization for Angina 38%

Secondary endpoints (cardiovascular death, reinfarction, or stroke) reduced 40%.
Cardiovascular death reduced 47%.

This is truly amazing. In all my years as a cardiologist, these are the most amazing results I have ever seen.

A second sub study was presented evaluating high dose vitamins versus low dose vitamins.

Overall 11% reduction in events

Death reduced 7%

MI reduced 5%

Stroke reduced 47%

Coronary revascularization reduced 16%

Hospitalization for angina reduced 37%

Secondary endpoint reduced 28%

Cardiovascular death reduced 20%

Congratulations to Drs. Lamas and Escolar as well as ACAM's own Allan Magaziner, co-author; ACAM and all the ACAM doctors who helped complete this monumental study.

See the hit film on chelation, "Unleaded," as well as the latest book, "Healing Heart Disease with Chelation Therapy." Our latest You Tubes are online, search for Dr. Roy Heilbron MD.
