

Cyberkit 1.0

An Official publication of the **Automotive Parts Manufacturers' Association (APMA) Cyber Security Committee**

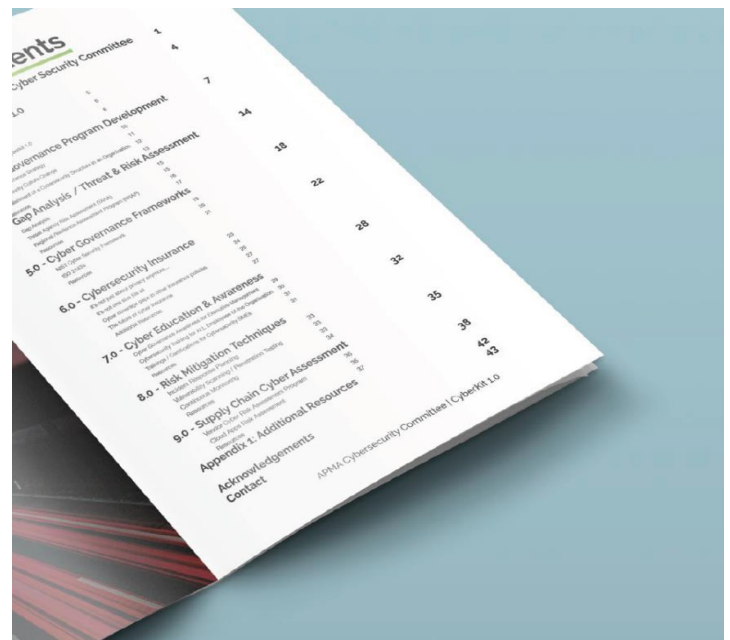

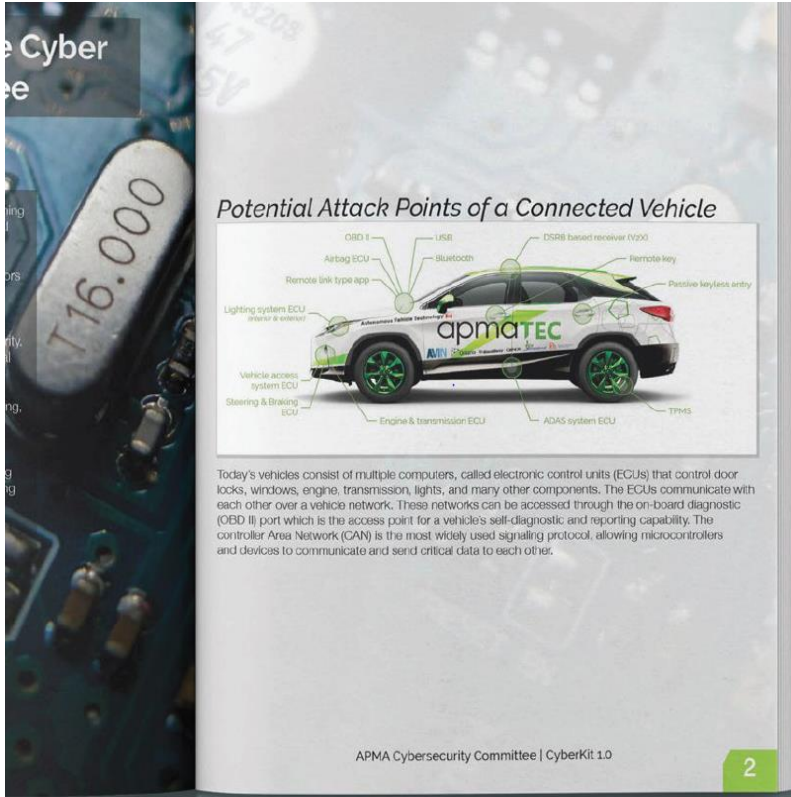

Cybersecurity in Automotive Manufacturing Sectors is becoming increasingly critical as everything within the industrial ecosystem becomes more connected to the internet and other technical systems and industries.

Electronics in vehicles are built from components supplied by multitudes of vendors, from numerous suppliers who have few, to no common cybersecurity standards to adhere to, and few privacy or security provisions in their manufacturing facilities. This makes the current supply chain for vehicles extremely porous in respect to cybersecurity. Every possible vendor and all electronic components are potential points of vulnerability.

Cyberkit 1.0 will:

- Provide expertise and implementing best practices for securing products manufactured in a facility and for facilities themselves, their employees, and all Internet-of-Things (IOTT) equipment
- Provide guidelines for communicating to shareholders, regulatory authorities, and employees in the case of a security incident
- Support understanding of cybersecurity insurance risks and requirements
- Provide cybersecurity education for executives and employees
- Aid in understanding cybersecurity risks, threats and impacts to the bottom line.

The APMA has brought together globally-recognized leaders in cybersecurity and privacy organizations from the auto sector, quantum computing, blockchain, academia and the insurance industry to be part of APMA's **Cyber Security Committee (CSC)**. The current gaps and discrepancies within the automotive supply chain could lead to compromised software and hardware finding its way through to OEM vehicles. This needs to be addressed.

Developed by the CSC, **Cyberkit 1.0** supports the safety, privacy, and security culture of the Canadian automotive industry by providing organizations with resources to help implement security best practices and develop a secure supply chain and development process. **Get your copy today!**

APMA/CAMM Member: \$282.50 (\$250.00 plus \$32.50 HST)
Non-Members: \$565.00 (\$500.00 plus \$65.00 HST)

To order your digital copy, please complete the information below and send to [Glenda Tedesco](#). Upon confirmation of payment, you will receive your PDF copy of *Cyberkit 1.0* by email.
