

Aquatron Robotic Technology Ltd. is a global leader in the manufacturing of robotic pool cleaners based in Israel, and is amongst the very few manufacturers to focus solely on the development and production of robotic cleaners. With over 25 years of experience serving partners in more than 50 countries, we are currently entering the US market and building the infrastructure needed to service our partners who have been supporting our **Aquabot** brand for years. As we own the **Aquabot** brand and intend to introduce new product lines under it, we can also offer the flexibility of an OEM manufacturer and provide differentiation under private label branded products.

Earlier this year, **Aquatron** was acquired by the **BWT Group, Best Water Technology**, a global leader in water treatment technology, developing products and processes that are eco-friendly and cost-effective for residential, commercial and industrial applications. This acquisition provided Aquatron with much needed strong backing and created the opportunity for us to enter the US market.

Our US entity is **Steward Group LLC DBA Aquabot**, located at **7912 Industrial Village Road in Greensboro, NC 27409**. We can be contacted for all sales and products inquiries via our **Toll-Free number (833) 4MY-AQUA (833-469-2782)**, via email to aquabot@stewardgrp.com and via our web-site www.aquabot.com.

We are working closely with an experienced team of sales representatives that are based throughout the US. We have set up multiple authorized service centers to deal with service related inquiries, and we are continuing to grow our presence nationwide. Locations of our authorized service centers can be found on our web-site www.aquabot.com under **Contact Us**.

During this transition year, we are looking forward to developing long-term and mutually-beneficial relationships with our partners. We will continue to invest in and strengthen our **Aquabot** brand and to promote our new premium **BWT** product line.

About Best Water Technology Group:

The Best Water Technology Group is Europe's leading water technology business with a staff of 4,500, working on innovative, economical and ecologically friendly water purification technologies to provide private households, industry, commerce, hotels and municipalities with the safest, healthiest and most hygienic water possible for their day-to-day needs. BWT provides modern purification systems and services for drinking water and water used in pharmaceutical and other processes, heating, boilers, cooling and air conditioning as well as water used in swimming pools. The company's research and development staff work on new techniques and materials using cutting-edge methods to develop economical and ecologically friendly products. Employees work particularly hard to create products, which use fewer resources and less energy, thereby reducing CO2 emissions
