

Canada Air Pilot New Format Orientation and Operational Update Workshops

At the request of NAVCANADA, as a service to the aviation industry, the Canadian Council for Aviation & Aerospace has developed a two hour workshop focusing on changes to air navigation procedures. This workshop is vital to any stakeholder using the air navigation system in Canada.

This Workshop is designed for:

- Individuals providing instrument training to student pilot
- Individuals currently exercising instrument rating privileges
- Organizations operating aircraft in instrument conditions

Course Content

CAP/RCAP Format Improvement

- Create compliant and more effective CAP depictions of instrument procedures
- Review current regulations and global best practices

Operational Procedures

- Constant Descent Final Approach
- SIDS and STARS
- Helicopter Procedures
- Visual Approaches
- Required Navigation Procedures

Industry Best Practices

- Essential Background knowledge
- Simulator techniques
- Air Training and Testing
