

Learn more about Health Homes Initiative

The Kansas Health Homes Initiative for individuals with certain Serious Mental Illness (SMI) launched in July of 2014 with services to members beginning in August 2014.

In celebration of all the hard work of Health Home Partners from across the state, the KDHE Department of Health Care Finance recently published a booklet called **Health Homes: Early Implementation Successes** to the [KanCare Health Homes website](#). To see the powerful stories of members who have already benefitted from Health Home services, visit http://www.kancare.ks.gov/health_home/download/HH-Success-Booklet-Proofout.pdf. This booklet is a great way for consumers and organizations to learn more about how the Health Homes initiative in Kansas is helping to improve lives.

KDHE continues to collect success stories for their [Health Homes Herald newsletter](#) and hopes to publish a larger booklet later in the year. If you have a Health Homes success story, or know of one, send it to Samantha Ferencik at sferencik@kdheks.gov or to the Health Homes email box at healthhomes@kdheks.gov.
