

TFW Neighborhood Conversations

Tobacco Free Wichita (TFW) is conducting a series of [Neighborhood Conversations](#) around issues regarding tobacco retail advertising and marketing programs, especially those appealing to children. TFW will ask the members of the public who are directly affected to weigh-in on strategies such as: reducing the amount of retailers in priority areas identified through previous TFW research, limiting the distance of tobacco retailers from schools to 1000-feet, limiting the space allowed for all exterior advertising at retail establishments, and regulating flavored tobacco products. Invite your patients to attend if they live in these areas in Wichita. Here is the schedule:
