

2015 Family Medicine Match Results

Match Day is exciting for fourth year medical students, their advisors, and residency programs! Prior to Match Day, which was March 20, fourth year medical students interviewed with residency programs and ranked their preferences. The programs also ranked the students. Students learned on Match Day where they matched and where they will go for residency training.

All four of Kansas' family medicine residency programs filled during the match. Here are the results:

- Via Christi Family Medicine Residency filled with 18 incoming residents
- Wesley Family Medicine Residency filled with 10 incoming residents
- Kansas City Family Medicine Residency filled with 9 incoming residents
- Smoky Hill Family Medicine Residency filled with 5 incoming residents

Congratulations to all!

AAFP reports that 3,060 graduating medical students choose a career in family medicine this year. 2015 is the sixth straight year that the family medicine match rate ticked upward when compared to the previous year.
