National Marine Fisheries Questionnaire

The permit process with National Marine Fisheries has caused severe delays in obtaining permits for marine construction projects. In an effort to work with congressional representatives to assist all of us in resolving this issue and get the process on track for reasonable application guidelines and timelines I would like to gather the following information to use in these discussions.

We will require the following information:

- Project Name and Location
- Typical Project Type
  - Commercial Marina, Boat Yard, or Dry Stack
  - Seawall Replacement /Entombments/Rip Rap
  - Mangrove Impacts, Boat Ramps, Other
- Approximate Project Value
- Date of Permit Application
- Date Approved or Still Pending

Project Name	Location	Type	Value	Application Date	Approved Date or Pending

Please return the questionnaire to miafpresident@boatflorida.org
