

Do you manage your church or does it run you?

You have a Spirit inspired message to share and you are bogged down in practical daily management issues.

To be effective as a steward of God's people, you must be **organized** in the backroom.

Proclaim Church Management Software **equips you** to have access to all relevant information at your finger tips through **your** prescribed dashboard. You set up exactly what reports you want in your chosen formats.

God's vision for your specific mission requires organization not only to spread His message but also to nurture the people He sends as members and visitors, who are all potential members. You **must** close the back door.

In order to do good works you need both personnel and financial resources which must be employed effectively to do the most good. Skills assessment, training, encouragement and accountability are necessary to do the work needed to give the church a strong administrative foundation.

In this modern age, with unprecedented distractions, it is critical to get and maintain the attention of the church participants.

Proclaim Church Management software **unifies** all the management aspects of church people, activities and administration into one database that includes all areas: attendance, visitors, members, spiritual growth path, leadership duties, church project planning, tithes, offerings, fund raising, facilities management, classes, calendars and schedules and all other resource managements.

You want your members to thrive through the Word of God, prayer, counseling, follow-ups, spiritual growth path, small groups, missions, volunteering and tithing. It is your responsibility to keep track of all this relevant information and communication.

With well-trained staff and volunteers, a well-managed administration will facilitate these necessary requirements so the **Pastor and Leadership** can have access to timely information and assist members appropriately and be relieved from daily administrative woes to **focus** and the Lord's vision for their ministry.

The Church will prosper when the focus can be worship, spiritual growth and evangelism. **This is what grows the modern church**, people being prepared and plugged in where God leads them to implement His vision.
