

Goldman  
Sachs

Make things possible.

A woman with long dark hair, seen from behind, is writing code on a whiteboard. The code is in Java and includes a method signature 'public static String longestUniqueSub', a map declaration 'Map m = new HashMap<Char', and a loop 'for (int i = 0; i < input.length(); i++)'. To the left of the whiteboard, there is a diagram with nodes labeled 'C' and 'D' and arrows indicating relationships. The text 'You solve problems. So do we. Learn more about your place at Goldman Sachs.' is overlaid on the left side of the image.

**You solve problems.  
So do we.**

**Learn more about your place  
at Goldman Sachs.**

```
public static String longestUniqueSub
Map m = new HashMap<Char
String "
for (int i = 0; i < input.length();
    m.put(char(i),
        + charAt(i)
        + (i)
length
return
```

### **Applications are now open for Goldman Sachs' 2019 Spring Exploratory Programs!**

Our Exploratory Programs allow college freshmen and sophomores to learn more about financial services as well as our firm's business, people and culture. Our goal is to bring students together from different schools, majors and backgrounds and to help set them up for success as they explore future career interests and opportunities. Our program includes skill-building workshops, interactive case studies and networking sessions with Goldman professionals. [Click here](#) to learn more.
